

# ADDRESS TELEPHONE TRACE REPORT (ATTR)

## **NEW!!! DEBTOR TRACE SERVICE**

Tracking down tenants who've left owing housing charges is time-consuming, labor-intensive, and always costly.

Let Rentcheck help!

In partnership with a major industry-trusted North American data provider, Rentcheck is now offering an Address and Telephone trace, a powerful Debt Recovery Service that accesses the same multi-source tracking information available to professional collection agencies - information not found on standard credit reports.

We can save you high collection commissions and the stress of going it alone.

**HOW IT WORKS:** Just send us one or as many debtors' names, phone numbers and the most current addresses you have on file. We will then run your debtor(s) through an address and telephone deep data trace.

Cost per name searched is \$3.00.

Rentcheck's ATTR can generate current location and contact information within 7 business hours.

Remember: You can't file a claim or proceed on a case against a debtor to recover your debt owing without serving the claim to a current location. That's where our new Address/Telephone Trace Report service is invaluable in finding individuals who intentionally evade their financial obligations.
